Labatt Breweries of Canada
IT Solutions intern (Summer 2019)

To whom it may concern.

I would like to express my interest in the IT Solutions intern opportunity available at Labatt Breweries. As a current Computer Programmer and Analyst student at Niagara College, I am actively searching for Coop and internship positions and I came across this one while surfing LinkedIn. As a future graduate I see this position as a perfect opportunity to gain some valuable experience as well as expand my current knowledge.

I am a great match for this position since I enjoy being challenged and engage in projects that require me to work outside my comfort zone, knowledge set and require me to think outside the box. Besides knowing some, continuing to learn new languages and development techniques are important to me.

Your listed requirements closely match my background and skills. And also, I would like to highlight some additional skills:

- Experience with cloud platforms (AZURE)
- Experience with mobile application development (XAML)
- Experience with full-stack technologies (.Net)
- Practical experience in web application development
- Project management experience in web development

I've attached a copy of my resume that elaborates on my experience in development. I can be reached any time using the information provided in the header of the page.

Thank you for your time and consideration. I look forward to speaking with you about this opportunity.

Regards,
Filip Lyesovyy.
