Gibbys Electronics Supermarket
Website Developer/Marketer

To whom it may concern.

I would like to express my interest in the Website Developer/Marketer position available at Gibbys Electronics Supermarket. As a current Computer Programmer and Analyst student at Niagara College, I am actively searching for Coop and internship opportunities and I came across this one while surfing my career section at my school's website. As a future graduate I see this position as a perfect opportunity to gain some valuable experience as well as expand my current knowledge.

In my opinion I am a great match for this position since I enjoy being challenged and engage in projects that require me to work outside of my comfort zone and knowledge set. Thus, learning new programming languages, frameworks and simply challenging myself with something new is very important to me. My vast international experience made me a real "outside of the box" thinker as I have seen and experienced things all around the world that simply do not exists anywhere else.

Your listed requirements closely match my background and skills. Also, I would like to highlight some additional skills:

- Great Communication Skills (Both written and verbal)
- Practical experience with Wordpress
- Experience with cloud platforms (AZURE)
- Experience with mobile application development (XAML)
- Experience with full-stack technologies (.Net)
- Practical experience in web application development
- Project management experience in web development

I've attached a copy of my resume that further elaborates on my experience in development. I can be reached any time using the information provided in the header of the page.

Thank you for your time and consideration. I look forward to speaking with you about this opportunity.

Regards,

Filip Lyesovyy.
